STATUS OF THE CLAIMS

Claims 1-23 are pending in this application

RESTRICTION REQUIREMENT

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 6-10 and 16-20, drawn to an inhibitor of memapsin 2 comprising an isostere of the active site of memapsin 2 wherein the inhibitor is OM99-1 and a method of synthesis thereof, classified in class 530, subclass 324.
- II. Claims 1-3 and 5-23, drawn to an inhibitor of memapsin 2 comprising an isostere of the active site of memapsin 2 wherein the inhibitor is OM99-2 and a method of synthesis and treatment thereof, classified in class 514, subclass 12.

The inventions are distinct, each from the other because:

Invention I and II are distinct one from the other, Inventions are distinct because they have different structure, mode of operation, different function and different effects. Furthermore, the library and computer searches are not coextensive. A reference which would make obvious claims drawn to one of the inventions may not obviate claims drawn to the other invention-absent ancillary evidence.

Art Unit: 1653

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

ELECTION OF SPECIES

Claims 1-23 are generic to a plurality of disclosed patentably distinct species of inhibitors having various molecules and/or structures as recited in general formula of claim 3 and Figures 10-13 of claims 5-9. *Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of molecules, together with a structure and an ultimate specie of an inhibitor and indicate claims reading on the elected species within the elected invention*, even though this requirement is traversed.

An ultimate specie of an inhibitor of memapsin 2 is an inhibitor wherein all of the variables of the inhibitor are accounted for.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

CONCLUSION AND FUTURE CORRESPONDENCE

Claims 1-23 are subject to restriction or election requirement.
